SUMMARY

Passionate full-stack web developer with a focus on delivering scalable and efficient web solutions. Seeking an opportunity to work in an environment that fosters creativity, encourages learning, and promotes professional growth. I aim to contribute to a dynamic team, enhance my knowledge of emerging technologies, and deliver high-quality software solutions that exceed client expectations.

PROJECT WORK

Movie Review API

API Repository

- An API where users can rate and write reviews of particulars and organise different movie lists
- Features include user profiles, movie abouts page and JWT user authentication
- Created on Python Flask and Postgres database

Portfolio Prototype

Website Link

- Portfolio website with placeholder text created by hard coding in HTML and CSS
- Features include homepage and blog plot pages with content organised with flexbox and the 12-grid system

WORK EXPERIENCE

Warehouse Customer Champion

Mainfreight   2022

- Data Entry, operating multiple systems concurrently and record keeping relevant information in the correct platform- providing updates to customers and resolving any issues that arose
- Responding to customer enquiries, liaise with transport team, and prioritise tasks for operations team
- Managed multiple customer accounts in warehouse stock control, inbound and outbound via phone, email and in person
